

wk3-4-followup-work

Invalid Date

Introduction

In this assignment you will locate, critique, and share two data visualizations.

- You choose the topic(s) of interest to you.
- The visualizations can be unrelated to each other.
- One should be “good” and the other should be in some way(s) “less good”.
- You can search¹ news sources, academic journals (access on campus or through google/google scholar), or government or non-governmental organizational sites.

You should,

- Give a few sentences of context for the visualization, including a link to the original source. Consider saving the source at <http://archive.org>.
- Describe what you think each visualization is designed to illustrate and comment on how well you think each achieves its goal.
- Identify any changes to the format or style that you might make with access to the original data.
- Include the visualizations and description in a *single pdf document*. You can make the pdf in Quarto², Google Docs/MS Word (export pdf), or L^AT_EX.
- Upload the pdf to D2L with the name lastname-firstname-critique.pdf.

Other important guidelines.

- Please no ChatGPT/Generative AI.
- Please avoid overused examples from “Bad Dataviz” blogs.

¹Search tips, combine an interest with phrases like graph, chart.

²To include images in Quarto, use ! [Caption.] (filename.<ext>), png, jpg are recommended extensions.
